Docket Number: 10990419-1

The amended claims are as follows:

1. (Once Amended) A system for controlling document region analysis, comprising:  
a digital document analyzer configured to determine a number of regions on a digital document and a data type for each of the regions, the data type for each region being one of a number of predefined data types;  
a selection interface for selecting at least one of the predefined data types for further processing; and  
a user interface that displays the digital document, wherein only ones of the regions that comprise one of the predefined data types selected in the selection interface appear in the displayed version of the digital document.

7. (Once Amended) A system for controlling document region analysis, comprising:  
analyzing means for analyzing a digital document to determine a number of regions thereon and a data type for each of the regions, the data type for each region being one of a number of predefined data types;  
selection means for selecting at least one of the predefined data types for further processing; and  
user interface means for displaying the digital document, wherein only ones of the regions that comprise one of the predefined data types selected in the selection interface appear in the displayed digital document.
